

## Biobanking Courses - Register now!

### At Medical University of Graz - International Biobanking and Education

As an internationally renowned team, International Biobanking and Education offers different educational opportunities for international biobankers.

- **Basic course: How to build a biobank**

This interactive 2-day-course is designed for all those who are involved in setting up a new biobank, who wish to collaborate with a biobank or research institute, who are facing the challenges of a growing biobank or who are trying to overcome the challenges of maintaining a large biobank.

**Date:** 16. - 17.09.2021

- **Advanced course: How to operate a biobank sustainably and successfully**

This course is aimed at all those who have already set up a biobank and want to operate a biobank successfully in the long term. This is a 5-day-course, consisting of 5 modules. However, each module can be booked individually.

**Date:** 20. - 24.09.2021

- **Team Management and Project Management Training for Research Facilities**

**NEW COURSE:** This course has been designed for those who work in teams in research facilities. Research teams may be described as a research group, research centre, and research unit or research institute. Whatever term is used, the key characteristic of a research team is that it very often comprises a multidisciplinary group of people working together in a committed way to achieve scientific goals. This is a 5-day-course, though that individual module can be booked in combination with the introduction module.

**Date:** 22. - 26.11.2021
